

# High Speed Internet WITH NO STRINGS ATTACHED

## Welcome to Broadband Wireless Internet Services!

Using the latest 802.11 wireless technology, E-Net can provide a dedicated high-speed Internet connection to your home or office. This means no high-cost phone circuits or waiting for cable delivery to your location. Wireless Internet does not require phone or cable services. E-Net offers two different speed choices, which can accommodate a single computer or a whole network of computers. Equipment packages can be purchased outright, rented, or put on a 6 month lease-to-own program. E-Net currently has multiple access points in the Rapid City and Hill City areas and will continue to expand our coverage areas.

Monthly rental .....	\$10.00 per mo.
External Workgroup Bridge and Router .....	\$600.00 (\$500 if you already have your own compatible router)
6 month payment plan .....	\$105.00 for 6 mo. (\$88.50 if you already have your own compatible router)
Monthly rental .....	\$25.00 per mo. (\$20 if you already have your own compatible router)

## Additional Charges

Some cities will have an additional \$5.00 monthly **Location Access Charge** if they fall outside the Rapid City wireless access cloud. If a wireless access point can not acquire Internet access from the local Rapid City access cloud it will require additional Frame Relay or T-1 circuits to provide Internet to the access point. The **Location Access Charge** will be applied in these situations.
